

Investment Objective

The Unicorn UK Ethical Income Fund aims to provide an income by investing in UK companies which meet the ACD's ethical guidelines. For this purpose, UK companies are defined as those which are incorporated or domiciled in the UK, or have a significant part of their operations in the UK. Selection of such ethical equities will be undertaken on the basis of thorough company analysis, with ethical and socially responsible criteria reviewed at the point of investment and quarterly thereafter.

Investment Policy/Strategy

The Fund may also invest, at its discretion, in other transferable securities, deposits and cash. The Fund may also enter into certain derivative and forward transactions for hedging purposes. The Fund invests at least 80% in UK quoted companies with a bias towards small and medium sized companies (those with a market value of less than £4 billion). Some of the companies may be quoted on AIM. AIM is the London Stock Exchange's international market for smaller, growing companies. There is no guarantee that the target return will be achieved over a 3 year, or any other period, and investors should note that their capital is always at risk.

Fund Commentary

The UK Ethical Income Fund recorded a total return of -1.4% in November, compared to an average total return of -2.0% from the IA UK Equity Income sector over the same period.

The largest contributor was Telecom Plus, which added 0.7% in Fund performance terms. Telecom Plus released interim results during the month, which reported on a period of resilient trading. The company's growth outlook has also improved materially as a number of loss-making competitors in the retail energy market have failed in recent months, thereby improving Telecom Plus' prospects for growth.

Vesuvius was the largest detractor during the month, costing 0.5% in overall Fund performance terms. Vesuvius released a third quarter trading update in November, which cited that significant cost increases are offsetting a generally buoyant demand environment. Brewin Dolphin was another significant detractor during the period, costing the Fund 0.4% in overall performance. Brewin Dolphin released full year results during the month for its financial year ended 30 September 2021, which highlighted that increased costs including; salaries, national insurance, IT systems and depreciation, have resulted in reduced profit forecasts for the current financial year.

A number of holdings were initiated during the month as the transfer of the equity assets of the Acorn Income Fund completed. The new holdings were; Chesnara, Curtis Banks, Ocean Wilsons, Alumasc, Topps Tiles, Braemar Shipping and Warpaint. The transferred assets were long-term holdings within the Acorn Income Fund, which was an investment company managed along similar lines to the UK Income Fund. The new holdings improve the aggregate dividend yield of the Ethical Income Fund.

The Fund also participated in the initial public offering of shares in Stelrad during the month. Stelrad is a leading manufacturer of steel panel radiators in Europe.

Unicorn Asset Management Limited (Unicorn) is an independent, specialist fund management group, established in July 2000.

Unicorn focuses on long term, long only, investment in UK quoted companies and aims to achieve superior absolute returns through the application of traditional, fundamental principles of investment.

All figures within this factsheet have been calculated with reference to 30 November 2021 with exception to the on going charge figure which is based on the annual accounts for the 12 months ended 30 September 2020

- Past performance is not a guide to future performance. The value of investments and the income from them may go down as well as up and investors may not get back the full amount of their original investment
- Unicorn Asset Management do not give out investment advice, we recommend that you contact a financial advisor if you are unsure whether to invest
- Investors should also read the Prospectus and KIID document of the fund before making an investment
- Equities are subject to greater degrees of market risk than other types of investment, such as bonds or money market instruments. You should not invest unless you are prepared to accept a higher degree of risk
- Investing in smaller companies, including AIM companies, can carry greater risks than those usually associated with large capitalisation companies. Smaller companies are likely to be less established and may not have access to the financial resources available to their larger counterparts. The shares of smaller companies are relatively illiquid and under-researched.
- Taxation levels, benefits and reliefs may all vary depending on individual circumstances and are subject to change
- Opinions expressed in this factsheet are subject to change without notice.
- A key objective of the Fund is to provide income, therefore, some or all of the annual management charge is taken from capital rather than income. This can reduce the potential for capital growth.
- Unicorn Asset Management Limited are authorised and regulated by the Financial Conduct Authority.
