Andrew Davey
Portfolio Manager

Past performance is not a guide to future performance, performance is based on returns net of fees. Your capital is at risk, the value of investments and the income from them may go down as well as up. Investors may not get back the amount of their original investment.

Investment Objective

The Unicorn Mastertrust Fund aims to achieve long term capital growth by primarily investing in a range of listed investment companies.

Investment Policy/Strategy

The investment companies themselves invest around the world. Investment companies are companies that can invest in a portfolio of assets. Their shares are listed on a stock exchange, in the same way as a normal company. The fund will choose investment companies which the Manager believes have good potential to grow and which are attractively priced. The fund may also invest, at its discretion, in other transferable securities, deposits, cash and near cash and units of eligible collective investment schemes. The fund may also enter into certain derivative and forward transactions for hedging purposes. The fund invests for the long term and there is no guarantee that any particular return will be achieved, over any period, and investors should note that their capital is always at risk.

Past Performance - 10 Years

31/03/2014 - 31/03/2024 Data from FE2024

Cumulative Performance

- Past performance is not a guide to future performance. The value of investments and the income from them may go down as well as up and investors may not get back the full amount of their original investment
- Unicorn Asset Management do not give out investment advice, we recommend that you contact a financial advisor if you are unsure whether to invest
- Investors should also read the Prospectus and KIID document of the fund before making an investment
- Equities are subject to greater degrees of market risk than other types of investment, such as bonds or money market instruments. You should not invest unless you are prepared to accept a higher degree of risk
- Investing in smaller companies, including AIM companies, can carry greater risks than those usually associated with large capitalisation companies. Smaller companies are likely to be less established and may not have access to the financial resources available to their larger counterparts. The shares of smaller companies are relatively illiquid and under-researched.
- Taxation levels, benefits and reliefs may all vary depending on individual circumstances and are subject to change
- Opinions expressed in this factsheet are subject to change without notice.
- Unicorn Asset Management Limited are authorised and regulated by the Financial Conduct Authority.
