Past performance is not a guide to future performance, performance is based on returns net of fees. Your capital is at risk, the value of investments and the income from them may go down as well as up. Investors may not get back the amount of their original investment.

Investment Objective

The Unicorn Outstanding British Companies Fund aims to achieve long term capital growth by investing in a portfolio of outstanding British companies by taking a long term view of not less than five years.

British companies are defined as those which are incorporated or domiciled in the UK or have a significant part of their operations in the UK. At least 80% of the companies that the Fund invests into will be British companies. The Fund can also invest into companies that are not otherwise British companies but are listed on stock exchanges in the UK.

Investment Policy/Strategy

Outstanding companies are defined as those whose economics and risks are well understood, whose revenues, earnings and cash flows are predictable to a reasonable degree of certainty, which sell products and services into growing markets, which have market leadership positions and lasting competitive strength, which generate high average and incremental returns on invested capital, which convert a high proportion of their earnings into free, distributable cash, which can show a consistent track record of operating performance, which are run by decent, experienced individuals, who manage their businesses with the goal of maximising owner-value, which operate with low core debt, which are not predominantly acquisition-led, and which produce clean, intelligible financial statements. The fund may also invest in smaller companies, including companies quoted on AIM. AIM is the London Stock Exchange's international market for smaller, growing companies. The fund may also invest, at its discretion, in other transferable securities and deposit and cash. The fund may also enter into certain derivative and forward transactions for hedging purposes. The fund invests for the long term and there is no guarantee that any particular return will be achieved, over any period, and investors should note that their capital is always at risk.

Past Performance - 10 Years

Cumulative Performance

- Past performance is not a guide to future performance. The value of investments and the income from them may go down as well as up and investors may not get back the full amount of their original investment
- Unicorn Asset Management do not give out investment advice, we recommend that you contact a financial advisor if you are unsure whether to invest
- Investors should also read the Prospectus and KIID document of the fund before making an investment
- Equities are subject to greater degrees of market risk than other types of investment, such as bonds or money market instruments. You should not invest unless you are prepared to accept a higher degree of risk
- Investing in smaller companies, including AIM companies, can carry greater risks than those usually associated with large capitalisation companies. Smaller companies are likely to be less established and may not have access to the financial resources available to their larger counterparts. The shares of smaller companies are relatively illiquid and under-researched.
- Taxation levels, benefits and reliefs may all vary depending on individual circumstances and are subject to change
- Opinions expressed in this factsheet are subject to change without notice.
- Unicorn Asset Management Limited are authorised and regulated by the Financial Conduct Authority.
