

Unicorn Outstanding British Companies Fund

February 2021

Investment Objective

The Unicorn Outstanding British Companies Fund aims to achieve long term capital growth by investing in a portfolio of outstanding British companies by taking a long term view of not less than five years. British companies are defined as those which are incorporated or domiciled in the UK or have a significant part of their operations in the UK. At least 80% of the companies that the Fund invests into will be British companies. The Fund can also invest into companies that are not otherwise British companies but are listed on stock exchanges in the UK.

Investment Policy/Strategy

Outstanding companies are defined as those whose economics and risks are well understood, whose revenues, earnings and cash flows are predictable to a reasonable degree of certainty, which sell products and services into growing markets, which have market leadership positions and lasting competitive strength, which generate high average and incremental returns on invested capital, which convert a high proportion of their earnings into free, distributable cash, which can show a consistent track record of operating performance, which are run by decent, experienced individuals, who manage their businesses with the goal of maximising owner-value, which operate with low core debt, which are not predominantly acquisition-led, and which produce clean, intelligible financial statements. The fund may also invest in smaller companies, including companies quoted on AIM. AIM is the London Stock Exchange's international market for smaller, growing companies. The fund may also invest, at its discretion, in other transferable securities and deposit and cash. The fund may also enter into certain derivative and forward transactions for hedging purposes. The fund invests for the long term and there is no guarantee that any particular return will be achieved, over any period, and investors should note that their capital is always at risk.

Assistant Fund Manager - Max Ormiston

Fund Commentary

The Outstanding British Companies Fund registered a total return of +3.3% in January, compared to the IA UK All Companies sector average total return of -0.9% over the same period.

The top contributor was Tristel, which added +0.7% to Fund performance overall. Tristel's share price rose despite an absence of notable company news during the month. The second largest contributor was Keystone Law, adding +0.6% in Fund performance terms. Keystone Law released strong trading update during the month, in which management stated that underlying profits for the financial year ended 31 January 2021 are expected to be ahead of analysts' forecasts.

The principal detractor was Advanced Medical Solutions, which cost -0.2% in Fund performance terms. The Board of Advanced Medical Solutions expect to report underlying profits for the financial year ended 31 December 2020 that are in line with market expectations. Management also confirmed that the company's balance sheet remains robust and that the order book for the current financial year is strong.

Several existing investments were topped up during the month, taking advantage of relative weakness in the share prices of certain holdings.

Unicorn Asset Management Limited (Unicorn) is an independent, specialist fund management group, established in July 2000.

Unicorn focuses on long term, long only, investment in UK quoted companies and aims to achieve superior absolute returns through the application of traditional, fundamental principles of investment.

All figures within this factsheet have been calculated with reference to 31 January 2021 with exception to the on going charge figure which is based on the interim accounts for the 6 months ended 31 March 2020

- Past performance is not a guide to future performance. The value of investments and the income from them may go down as well as up and investors may not get back the full amount of their original investment
- Unicorn Asset Management do not give out investment advice, we recommend that you contact a financial advisor if you are unsure whether to invest
- Investors should also read the Prospectus and KIID document of the fund before making an investment
- Equities are subject to greater degrees of market risk than other types of investment, such as bonds or money market instruments. You should not invest unless you are prepared to accept a higher degree of risk
- Investing in smaller companies, including AIM companies, can carry greater risks than those usually associated with large capitalisation companies. Smaller companies are likely to be less established and may not have access to the financial resources available to their larger counterparts. The shares of smaller companies are relatively illiquid and under-researched.
- Taxation levels, benefits and reliefs may all vary depending on individual circumstances and are subject to change
- Opinions expressed in this factsheet are subject to change without notice.
- Unicorn Asset Management Limited are authorised and regulated by the Financial Conduct Authority.
